

DriTherm[®]

MOISTURE RESISTANT, THERMAL INSULATION FOR MASONRY WALLS

High Quality

Silicone treated glasswool to provide a premium solution for the lining and strapping of masonry walls.

Thermal Performance

High thermal performance with a material R-Value of 1.5 m²K/W.

Sustainability

Earthwool[®] glasswool: DriTherm masonry slabs are manufactured with ECOSE[®] Technology which reduces embodied energy and delivers superior environmental sustainability compared to other glasswool products.

Fire Performance

Earthwool glasswool: DriTherm masonry slabs are non-combustible and classified as Euroclass A1 to BS EN ISO 13501-1 – the highest possible.

Water Resistant

Earthwool glasswool: DriTherm masonry slabs contain a water repellent additive to ensure that the insulation is not affected by moisture in a masonry wall.

50 Year Guarantee

Earthwool glasswool: DriTherm masonry slabs are guaranteed for 50 years to resist the passage of water from the outer to the inner leaf.

DriTherm®

PREMIUM PRODUCT FOR MASONRY WALLS

DriTherm is made using recycled glass and with ECOSE® Technology.

ECOSE Technology is a revolutionary, more sustainable binder technology born from five years of intensive research and development. ECOSE Technology is based on rapidly renewable materials instead of petro-based chemicals such as phenol, formaldehyde and acrylics commonly used in traditional glasswool products. DriTherm has EUCB and FBS1 certification for the solubility of the glasswool fibres and contains no added formaldehyde, making it suitable for homes with allergy sufferers.

DriTherm	Thickness (mm)	R-Value (m ² K/W)	Length (mm)	Width (mm)	Pieces per pack	m ² per pack	Packs per SupaKube	m ² per SupaKube
